

KS-F18

2664Wh
Battery(50S)

5000W
Rated Power

120+km/h
Idle Speed

150km
Mileage

140kg
Max Load

100mm
Suspension Travel

Product Features

- The 2664Wh* large-capacity lithium battery pack provides a long range per charge, ensuring worry-free commutes and weekend trips.
- Newly coded BMS intelligent battery management system, multiple functions, fully protect the safety of battery cells.
- Adjustable pedal height to suit different riders' preferences to meet diverse needs.
- The motor temperature control protection system improves the motor's operating efficiency and stability and extends the motor's service life.

Detail Display

01

The First Transformer-inspired E-unicycle, Featuring A Modular Architecture, Brings Endless DIY Possibilities.

02

The 4 point suspension system has excellent applicability, can adapt to different weights, is highly durable, and provides a delicate, comfortable and stable riding experience.

03

Thanks to Apple Find My network, you can locate your E-unicycle anywhere!

04

5000W motor efficiently converts energy, outputs power continuously, and brings stronger acceleration.

KS-F22 Pro

3108Wh
Battery(50S)

5500W
Rated Power

130+km/h
Idle Speed

180km
Mileage

140kg
Max Load

100mm
Suspension Travel

Product Features

- With integrated light sensor that will turn on the lights when needed so you can relax in your night rides.
- A new generation of BMS intelligent battery management system, with multiple functions to protect the safety of battery cells in an all-round way
- Modular motherboard design, integrated taillights, charging ports, switches, displays and other accessories.
- Customizable RGB lights, break the color boundaries and enjoy your journey with a unique style on the road.

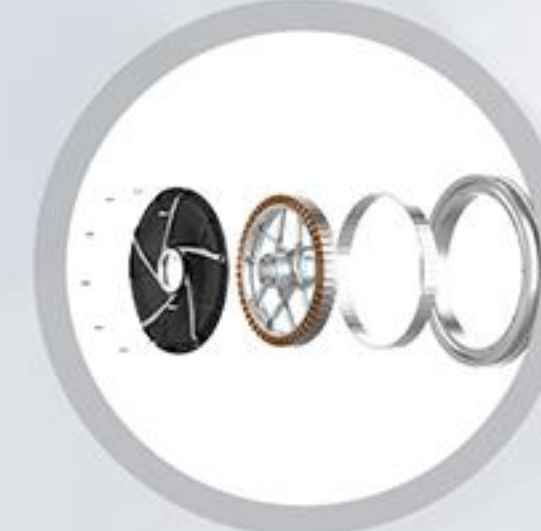

Detail Display

01

Thanks to the four suspensions F22 Pro can absorb any bumps much smoother which provides you unbelievable comfort of riding.

02

The most powerful motor we've developed in electric unicycles. 5500W motor will deliver the power you need. To conquer the steepest climbs in your journey.

03

The 3108Wh large capacity lithium battery delivers steady power output and an ultra-long range of 180km.

04

Connect to the Kingsong app to unlock even more functions, such as viewing vehicle status and customizing the vehicle to meet your riding needs.

KS-S22 Pro+

2220Wh
Battery(50S)

4000W
Rated Power

70km/h
Top Speed

200km
Mileage

120kg
Max Load

35kg
Weight

Product Features

- Controller integrates rear lights, charger, on/off, display, all within one for easier.
- Integrate power, speed, and other information into one matrix display.
- Aluminum constructed handle designed for ergonomic pushing of the wheel or lifting of the wheel.
- Added a comfortable seat cushion, ergonomic design, alleviating the toil of standing riding.

Detail Display

01

Variable Linkage dampening; Suspension system using 240-75 Spring Suspension; Suspension Travel 130mm, Spring Travel 75mm.

02

Higher power 4000w motor that provides a maximum torque of 200N.m providing fast acceleration.

03

8*5W lights on the left and right, automatically adjust the brightness according to the speed, and the two lights can adjust the angle separately to 15°, which provide good lighting at night.

04

Paired with Smart BMS system, check the battery health levels and ensure the safety of the packs.

KS-S19 Pro

1776Wh
Battery(50S)

3500W
Rated Power

60km/h
Top Speed

150km
Mileage

120kg
Max Load

33kg
Weight

Product Features

- 5W*6 high-power headlights, freely adjust the light angle and long irradiation distance, safer riding.
- A new generation of BMS intelligent battery management system, with multiple functions to protect the safety of battery cells in an all-round way
- Modular motherboard design, integrated taillights, charging ports, switches, displays and other accessories.
- The fuselage is surrounded by colorful LED lamp beads to form a galaxy lighting effect.

Detail Display

01

The racing-grade X-shaped linkage suspension structure is adopted to improve driving stability, and achieve strong support and soft linear suspension absorption experience.

02

Higher power 3500w motor that provides a maximum torque of 160N.m providing fast acceleration.

03

The 1776Wh large capacity lithium battery delivers steady power output and an ultra-long range of 150km.

04

Upgraded 4-unit acoustic configuration, exquisite acoustic structure, and improved sound quality.

KS-S18 Pro+

1110Wh
Battery(50S)

2200W
Rated Power

50km/h
Top Speed

110km
Mileage

120kg
Max Load

25kg
Weight

Product Features

- Variable linkage dampening air suspension system using 200-57 suspension.
- User experience focused ergonomic design to connect wheel with rider.
- 12 MOS design connected to aluminum body frame for fast heat dissipation without the need of fan.
- Ergonomic handle designed for pushing and lifting which can be hidden inside body frame when not in use.

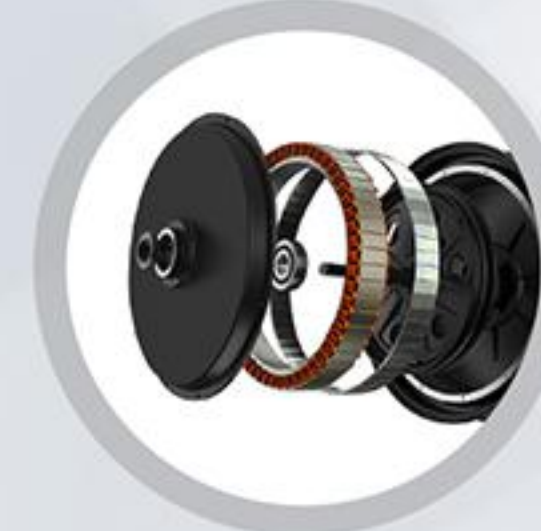

Detail Display

01

Variable Linkage dampening; air suspension system using 200-57 suspension, DNM AOY36RC.

02

Hefty motor providing 140Nm of torque allows for quick acceleration whilst ensuring there's not a hill you can't climb!

03

1600lm headlight with 2*5W (high beam) and 2*4W (short beam).

04

Spikes improve friction between shoes and pedal surface, making you feel more comfortable and safer.

Product Features

- Weakening field to boost speed enables stepless regulation with simple control, improving performance for efficient, powerful driving with balanced speed.
- The new software architecture innovation achieves efficient speed-up and quick response.
- The upgraded pedal improving friction between shoes and pedal surface, making the riding more comfortable and safer.
- The speakers deliver powerful sound and a direct impact, giving you a cinema-like sound experience.

Detail Display

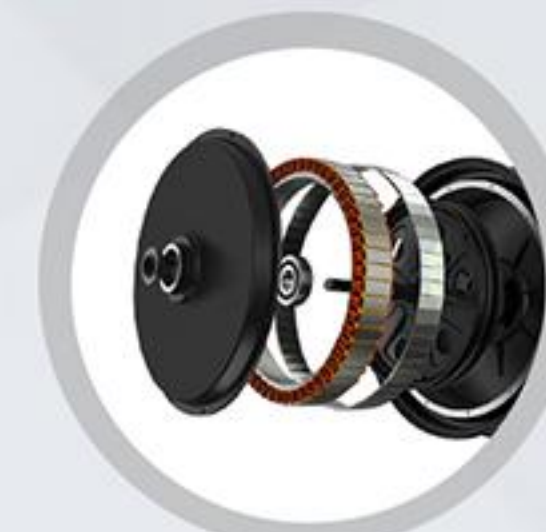

01

Integrate battery level, speed, and other information into one matrix display.

02

Features an integrated BMS battery management system, precisely monitoring battery status to extend lifespan and ensure safe operation.

03

The 4600W peak power motor delivers surging power, giving the vehicle amazingly powerful acceleration, helping you to travel freely and unimpeded through the city.

04

Features advanced Find My tracking technology to locate the vehicle's position in real-time, preventing theft and enhancing security.
